

## ADVANCED ROTARY CUTTER REPLACEMENT CUTTING HEAD

### Advanced Rotary Cutting Head & Replacement Cutting Wheels

In 2008, Keencut changed the design to the Advanced Rotary Cutter and Advanced Table Edge Cutter. The redesigned ARC & TE now features a heavy duty plastic black cutting head, larger diameter cutting wheels and a yellow site-line strip for better visibility. The cutting head design change has improved the performance and durability to the cutter. Due to this design change, the old style (grey) cutting head and replacement cutting wheels are obsolete and no longer available.

If you have an old style (grey) cutting head, then you must upgrade to the 69122 (black) cutting head. The 69124 replacement cutting wheels are for the black cutting head only and will not fit the grey style cutting head.

#### **OLD STYLE (Grey)**

Identified by the Grey Cutting Head and smaller diameter cutting wheels. This product and replacement wheels are discontinued.

#### **69122 NEW STYLE (Black)**

Identified by the black cutting head and larger diameter cutting wheels. The Replacement Wheels are Foster # 69124 and only fit the black cutting head.

#### Replacement parts for the ARC & TE
