

Designed specifically for fabric graphics cutting and finishing, Foster's HSGM Hot Cut offers a standard of straight, square and clean cutting. Your HSGM Hot Cut System includes:

- Sabre Cutter Bar and Base
- HSGM Heat Knife Carrier
- Silicone tape for a heat resistant surface*

What You Can Expect From the Hot Cut:

Accuracy.

Human errors and makeshift straight edges are now a thing of the past. With a single Allen key adjustment, the Heat Knife Carrier attaches directly to your Foster Keencut cutter bar. The Heat Knife cuts approximately 1/4 inch from the cutter's aluminum extrusion bar, ensuring precision straight-line fabric cuts in the same location every time.

Speed.

Your shop can accommodate today's high-demand fabric graphics – and more of them – using the heated blades of HSGM knives that cut and seal the edges of synthetic fabrics. Eliminate the time associated with cumbersome hand-cutting and final trimming of frayed or unraveled edges.

Safety.

The Heat Knife Carrier is safe to use. When the spring-loaded Heat Knife is depressed, a center post triggers the heating mechanism. As soon as it is released, the heating element automatically turns off.

**HSGM Heat Knife & tempered glass sold separately. It is recommended to use 1/4" tempered glass for a long term heat resistant surface. Heat Knives operate most efficiently on tempered glass surfaces, which do not absorb heat (unlike wood and metal surfaces), ensuring maximum blade heat for the most accurate cuts.*

Item #	Cut Size	Overall Size
61735.....	36"	46.5"L x 13"W
61737.....	75"	85.75"L x 13"W
61739.....	115"	125"L x 13"W

5-year general warranty on all parts (except blades, clamping strips and cutting wheels).
 20-year warranty on the bearings used in the cutting head.

First time considering heat knives and heat knife mounted cutter bars? Our complete system includes:

- Sabre Cutter Bar and Base
- HSGM Heat Knife Carrier
- Silicone tape for a heat resistant surface*
- HSGM Heat Knife Carrier
- HSGM Heat Knife
- HSGM HSO-N Blade
- HSGM Type R Blade

HSGM Heat Knife Use & Specifications

- Blade heat time: 6-8 seconds
- Blade temperature: approx. 1100 degrees Fahrenheit (600° C.).
- Electrical: Uses 120 V, 60 W

HSGM Hot Cut System. *Glass not included. 1/4" tempered glass recommended.
