

BEST WARRANTY IN THE BUSINESS

- 5 year general warranty
- 20 year warranty of the bearings

HEAVY DUTY BOARD CUTTER

For producing a clean finished edge on aluminum panel, PVC foam board, fluted plastics, corrugated card stock, and other rigid materials.

Lighter duty board cutter available: Excalibur 5000X

SteelTraK

Robust, reliable, and easy to use

- Turn-and- lock mounting for tools
- Permalock squaring means accurate cutting every time
- Same cut line for all tools
- Low friction ball bearings on a steel track ensures accuracy
- Telescopic legs for customized bench height
- Full-length, extra grip clamping system
- 20-year replacement guarantee on all sliding bearings
- Three sizes: 65", 82", 98"

SPECIALIZED CUTTERS

For precisely cutting flexographic plates.

Futura Flexo

For cutting flexo plates and other substrates

- Bevel and vertical cutting with one head
- Ergonomically designed cutting head
- Magnetic blade holders
- Roller 'lift and hold' system with one-handed operation raises or lowers the cutter bar and frees hands for precise placement without need to hold up the lifting handle
- Four sizes: 40", 48", 60.5", 86"

For accurately cutting and sealing textiles using a hot knife

HSGM Hot Cut System

A safe and accurate way to use a hot knife cutter

- Choice of spring loaded holder for either the SSGM HSGM or AZTC hot knife
- Securely holds the hot knife for accurate and safe 90° cutting
- Use on bench or mount to an optional stand
- Three sizes: 36", 75", 115"

PICTURE FRAMING CUTTERS

A professional cutting machine for picture framers.

Excalibur 5000

An advanced vertical cutter for the professional picture framer

- Twist and lock rotating turret
- Integral counterbalance
- Full-length clamping
- Telescopic legs for height adjustment
- Easy-to- use production stops
- Cut Size: 63" Telescopic legs
- Easy-to- use production stops

Perfect for cutting mat board blanks, backing board, Plexiglas, and glass

A heavy-duty mat cutter for production cutting of both thick conservation board and standard mat board.

Ultimat Futura

Technically advanced professional vertical mat cutter

- Ball bearing rollers deliver a smooth, precise and ultra low friction sliding action
- Unique microstops for precision adjustment
- Fatigue reducing roller lift & hold
- Three sizes: 40", 48", 60.5"

PRECISION BENCHTOP CUTTERS

For precisely cutting rigid and flexible materials, including PVC foam board, fluted plastics, card stock, banner substrate, paper, plastic film, and textiles.

SEE REVERSE FOR PICTURE FRAMING AND SPECIALIZED CUTTERS

Ultra high precision cutters for banners, wall coverings, and cut-joined multiple panel displays.

High precision cutters.

Highest Precision Available - Enduring Quality - Maximum Flexibility - Designed for Volume Production

Evolution-E2

A complete wide format cutting system designed for maximum cutting speed, accuracy, and user convenience

- Vertical cutting action, interchangeable tools
- Concealed cutter hinges leave worktop clear
- Integrated lifters
- Fits any bench
- Five sizes: 64", 84", 104", 124", 144"

Add the E2 Bench for a turnkey professional cutting system

Evolution-E2 Bench

Integrated aluminum base for quick and easy mounting of the Evolution-E2

- Quality precision alloy construction provides superior strength and lasting resistance to abrasions and damage
- Unique proprietary lock provides a rigid structure and extra safety under heavy load
- Extension kits available

Precise Design - Lasting Quality - Operational Flexibility - Designed for Volume Production

Designed for mounting on a flat, stable bench or surface

Javelin Integra

A precision cutter with an integrated base and lifting handles

- Fits most benches
- Horizontal cutting action
- Interchangeable tools
- Four sizes: 64", 84", 104", 124"

Add the Proteus to create the perfect cutting system

Proteus Bench

For use with the Javelin Integra or as a stand-alone bench

- Quality, precision alloy construction is strong and damage resistant
- Proprietary lock ensures safety and rigidity under heavy load
- Adjustable height

A cutter for use separately or on a bench

Javelin Series 2

Used as a portable cutter solution or on the mounted optional Big Bench

- Vertical cutting action
- Interchangeable tools
- 5 sizes: 1.1m, 1.6m, 2.1m & 3.1m

Big Bench Xtra: Designed for the Javelin Series 2

Big Bench Xtra

Designed specifically for the Javelin Series 2

- Integral lift and hold mechanisms
- Full-length adjustable base with cutting groove
- Quality, precision alloy construction is strong and damage resistant
- Proprietary joint locklock ensures safety and rigidity under heavy load

A portable cutter for general use

Simplex

A quality, light weight, general purpose alternative to the Javelin Series 2

- Portable
- Ergonomical rocker-style cutting head
- Five sizes: 44", 64", 84", 104", 124"

A portable cutter for general use

Sabre Series 2

Ideal for both individual jobs and volume production

- Precision cutter mounted on an anodized aluminum base
- Use on a bench or stand
- Interchangeable tools

A scissor-action cutter that cleanly and precisely cuts paper, offset printing plates, thin film, and other delicate materials

ARC and TE

- Available with or without a base
- Two-way cutting with twin tungsten steel cutting wheels
- Mount permanently to an existing table or optional movable stand
- Five sizes: 40" (TE), 42" (ARC), 60", 80", 100", 120"
